# OUR BUSINESS MODELS

## HELPING OUR CUSTOMERS

### Achieve & Maintain Market Leadership

We collaborate with clients to create relevant products and offer comprehensive services from design to manufacturing and servicing.

### Reach New Markets Through Product Redesign

Our experts help clients redesign products for different regions while maintaining consistent quality and functionality standards.

### Keep Products Relevant Now & Later

We help clients ensure their products stay relevant in a competitive market by testing, updating, and restructuring their specifications.

### Maintain Legacy Products

We address component obsolescence and compliance requirements like RoHS, while adding client-specified features to existing products.

### Ownership of Products

We help clients design their products while ensuring they retain all data and protect their designs from vendors and competitors.
